**FOR IMMEDIATE RELEASE**  
**April 1210, 2010**

### **SUN SHINES BRIGHTLY FOR GOOD NEWS RESCUE MISSION**

The Good News Rescue Mission (GNRM) partnered with Halcyon Solar Construction and Redding Electric Utility (REU) and installed a 9.4 kilowatt photovoltaic solar system at the mission on 3100 South market Street. On April 14, at 11 a.m. the GNRM along with the other two partners will celebrate the operation of the new solar power generation.

The new solar system will generate enough electricity to save the Good News Rescue Mission more than \$2,000 per year in energy charges. With Halcyon Solar donating the equipment and the installation along with REU’s enhanced incentive the project is a home run for the GNRM as they look to save money on operating costs which allows them to serve their patrons who are in need of help and assistance.

In terms of environmental impact, the project will eliminate as much as 600,000 pounds of carbon dioxide, which is the leading greenhouse gas, or the equivalence of taking three cars off the road for the next 25 years or planting five acres of trees.

Halcyon’s founder Dan Herman last year spearheaded another REU incentive driven project when he donated and installed a five kilowatt solar plant at the Shasta County Women’s Refuge facility.

For more information about REU’s solar program call 339.7300.

**REU...*Smart Service...Bright Ideas!***
